

Interior Lighting

Verona Ad-Lamp

Preliminary

Verona with shade

Standard Verona downlight

Installation

This is a surface mount luminaire and has 3 self tapping fixings. If used as a replacement it can be fitted with just the use of a screw driver, remove the existing fitting and the power supply fits through the existing 65mm hole. In new installations a 65mm hole is required through which the power supply can be placed.

For advertising and promotion simply print on A4 (landscape mode), cut in half and insert behind the tabs.

A qualified electrician is required for installation.

Please call our Technical Department for advice on 08456 434740

Applications

Shops
Shopping Malls
Restaurants
Clubs, Bars
Pubs
Libraries

Description

The Earlsmann Verona Ad-Lamp is a great way to increase brand awareness or for promotional advertising. The translucent polypropylene shade acts as an illuminated holder for advertising and promotion media. The light source itself is a cool running, highly energy efficient 12 Watt LED downlight. Use it above a serving area or bar since it is cool to work under.

Features

Low power consumption
Long life
Minimal maintenance
>80lm/W
Colour rendering 80 Ra
Self print poster

Benefits

Reduced energy usage, reduced CO2
Reduced maintenance costs
Reduced costs
