Applications

Kitchens
 Bathrooms
 Bar back
 Splash back
 Decor

Description

Earlsmann are pleased to offer illuminated glass tiles and splash backs in conjunction with Rupert Scott Glass. The Earlsmann LumaPex™ ultra-thin light panel is used behind the hand crafted glasswork to bring the designs to life. With the minimum of heat and no UV there will be no fading of colour. Tiles can be used in most locations including kitchens and bathrooms since they run on 12Vdc. The connecting wire is simply set in to the wall before tiling. Larger panels and splash backs can be mounted in the same way or hung on a wall as a feature.

All items are made to order.

Features

Bright
 Low power
 Cool white LED
 No UV, minimal heat
 12Vdc operation
 Glass tile

Benefits

Excellent for subtle illumination
 Economical to operate
 Good colour rendering
 No discolouring of images
 Safe
 Very durable

Specifications

Operating Voltage	12Vdc
Size	Dimensions depend on application
Thickness	Typically 20mm

Options

Dimmers
 For plain splash backs please see separate datasheet

Power Supplies

A range of 12V dc power supplies is available to suit each application.
