If you have a specific requirement:

Please call our Technical Department for advice on 08456 434740

Applications

Bars, restaurants
Hotel reception
Bedrooms
Home, office
Point of sale, advertisement
Awards

Description

The Lynton Lighting range of lamps has been produced using the expertise of Earlsmann and Acrylux to produce these beautiful designer lamps. Designed and made in Devon they are suitable for use in many environments.

The Lynton Wave Lamp is made using RGB colour changing LEDs. The colours change, merging slowly from one colour to another and can be set up with different colours on each wave. White can be selected from the remote RGB controller.

Company logos and other images can be engraved onto the wave to produce a unique, customised product range with many applications

Features
