St Ives Shelf/Display Light

Description

The Earlsmann "St Ives" discreet shelf or display light is manufactured in stainless steel to create a stylish lamp. The light source is ultra bright LEDs. The clever design provides an even illumination which was inspired by the quality and subtlety of light to be found in St. Ives.

They can simply be placed at the back of a shelf or fixed using screws or adhesive.

They are available in a range of standard sizes and finishes with a choice of colour illumination.
